Simpson Door and Barrons Lumber presentation – 1 HSW CEU lunch program

THE BATTLE AGAINST MOISTURE: WOOD DOORS

COURSE OVERVIEW

This course offers an in-depth look at exterior wood doors and the battle against moisture. The course qualifies for 1 HSW (health, safety, welfare) learning unit hour from the AIA.

Topics will include:

- Use of wood doors in architectural designs
- Key components of stile and rail wood doors
- Moisture protection

Learning Objectives:

After completing this course, participants will be able to:

- Specify how wood doors can be incorporated into a range of architectural styles for homes and light construction
- List the key components of stile and rail wood doors
- Describe common points of moisture vulnerability in exterior wood doors
- Explain manufacturing materials and techniques that can protect wood doors against water infiltration
- Discuss methods for designing building overhangs, and selection of wood finished, that further enhance wood door weatherability
